

# SEYMOURPOWELL

SeymourPowell is a design firm founded by Richard Seymour and Dick Powell. SeymourPowell specializes in transport design, product innovation, industrial design, and brand design. They have worked with Virgin Galactic to make their spaceship cabin windows bigger, to make the Earth more visible. They also worked with Unilever for designing their packaging

seymourpowell

Richard is a British industrial designer, that is a co-founder of the SeymourPowell. In 1984, Richard Seymour and Dick Powell founded SeymourPowell Richard Seymour designed one of the most iconic products from the last 2 decades. One of the designs that he made is a water-efficient, self-cleaning toilet with a self-disinfecting pine seat, and many more

Mr. Dick Powell is co-founder of internationally renowned design and innovation company, seymourpowell. He was worked with companies like Nokia, Casio, Tefal, and even Honda. He was partly responsible for massive designs such as the cordless kettle, the world's first truly pocketable mobile phone, and digital showers. He is based in the United Kingdom
